OUR COMPANY **WETOWN** ELECTRIC

Nuvolt® is a product line of power distribution and new energy equipment, manufactured by Wetown Electric Group Co., Ltd.

Founded in 1986, Wetown is now the nation biggest manufacturer in this industry.

With its installed bases in more than 40 countries (Asia, Europe, Oceania, Africa and America), Nuvolt® brings HIGHEST level of QUALITY, SAFETY and RELIABILITY to the market.

4 Manufacturing Bases

- High and low voltage bus bars, electrical appliances, and intelligent components
- Photovoltaic ribbon, copper and aluminum manufacturing base
- Energy storage and transformer manufacturing base
- Linjiang Surface Treatment Center

3 R&D Centers

Guangzhou, Nanjing, Yangzhong

136,000 m²

Land Area

84,000 m²

Building Area

300+ Patents

Domestic and International

WETOWN MILESTONES

STATE OF THE ART MANUFACTURING

Fully committed to develop Advanced Manufacturing and machineries, using automation, digital technology and lean production to optimize the layout of the production line process, improve the level of automation and digital manufacturing capabilities, and comprehensively improve production efficiency and product quality.

NUVOLT

HIGH & LOW VOLTAGE BUSWAY

LOW VOLTAGE

Pro B Busway

LB Low Power Busway

WLG Special Busway for Wind Power

LV Compact Busway

MM Powerplus V Series

Pro S Slide Rail Type Intelligent Busduct

GM-D Cast Resin Busway

Pro-F Fine-Rated Busway

Pro D Data Center Busway

Pro L Lightning Busway

MEDIUM & HIGH VOLTAGE

GFM Non-Segregated Busway

GLFM Isolated Phase Busway

Pro-T Insulated Pipe Busway

GM-Z Cast Resin Busway for Nuclear Power

TRANSFORMER

Nuvolt® 10kV and 35kV energy-saving transformers have the characteristics of safety, reliability, energy saving and quietness, and intelligent monitoring, which can meet the power consumption needs of different types of customers such as industrial and mining enterprises, urban CBDs, photovoltaic power stations, wind power generation, energy storage power stations, and data centers

SCB11~SCB18

10kV series, capacity 50kVA-4000 kVA;
35kV series, capacity 1000 kVA — 20000 kVA

GAS INSULATED METAL-CLAD SWITCHGEAR

Pro GIS Cubical type Gas-insulated Switchgear is an integrated assembly of vacuum circuit breaker, 3-position on switch, busbar connecting system and control devices coordinated electrically and mechanically for medium voltage power system.

The Metal-Clad design provides High reliability, Economy, User-Friendly operation and Safety. The compact design with three-phase enclosure allows very simple construction. In addition, switch components can be removed or added in a very short time without removing the busbar.

Pro GIS is available for rated voltage 12kV, 24kV, up to 40.5kV installed indoor

PROJECTS AROUND THE WORLD

Marina Bay Sands - Singapore

Santos GLNG - Australia

Beijing Capital Int'l Airport

TRUMP Tower - Philippines

Moscow Metro Stations

Hong Kong Zhuhai Macau Bridge

ION Orchard - Singapore
